Royde & Tucker

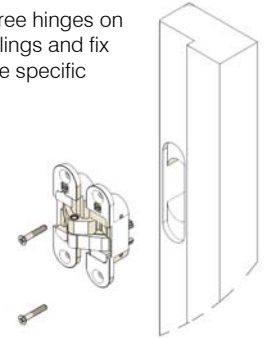

1. Turn the adjustment grain (vertical movement) clockwise until complete detachment of the connecting rods.

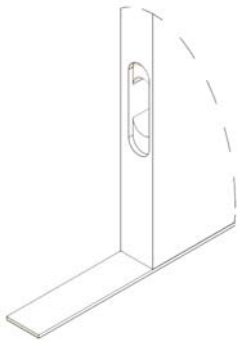

2. Turn the adjustment grain on the door side of the hinge counter clockwise until the hinge body arrives at the limit of the carcass.

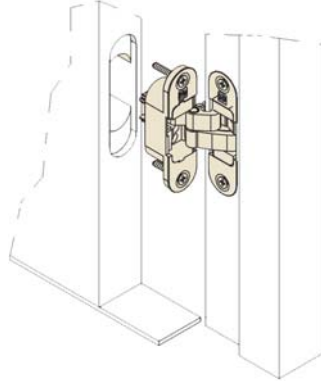

3. Set the three hinges on the jamb millings and fix them with the specific screws.

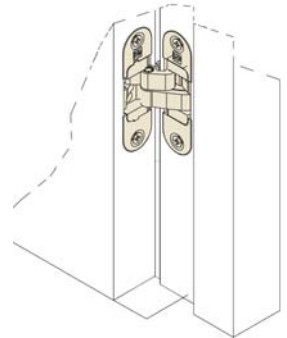

4. Insert a spacer (4 mm) under the panel.

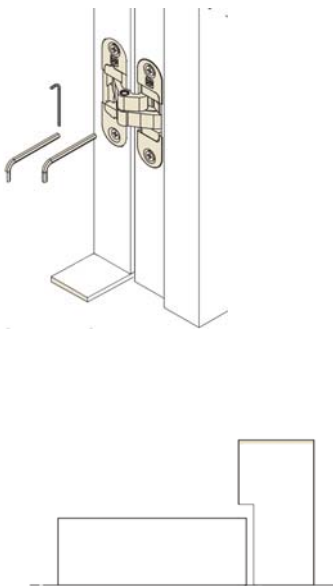

5. Set the panel at 90° angle to the jamb. Without removing the spacer of point 4, gradually insert the three hinges.

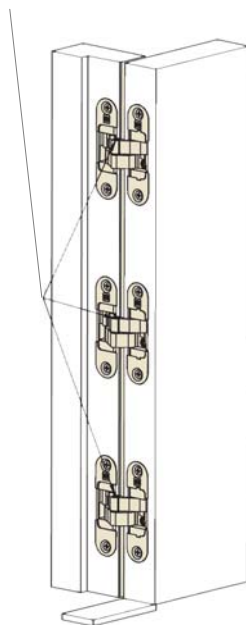

6. Set the three hinges with the specific screws.

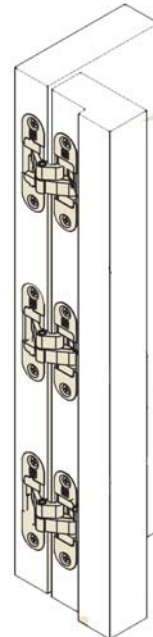

7. Begin the adjustment on three axis, starting with the top hinge.

8. Loosen the vertical adjustment grain of all the three hinges by turning it counter clockwise until the panel is laid on the spacer.

9. Adjust the hinges by turning the grain located on the frame until the door is in line with the jamb.

Aligned jamb and panel.
